

APPENDIX B

BIBLIOGRAPHICAL AND RELATED MATERIAL

15 Jan 91

B-1. Corps of Engineers Publications. All related publications are available on interlibrary loan from the Research Library, US Army Engineer Waterways Experiment Station, Attn: CEWES-IM-MI-R, 3909 Halls Ferry Road, Vicksburg, MS 39180-6199.

1. Brown, D. A., and Reese, L. C. 1988 (Feb). "Behavior of a Large-Scale Pile Group Subjected to Cycle Lateral Loading," Miscellaneous Paper GL-88-2, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
2. CASE Task Group on Pile Foundations. 1980 (Dec). "Basic Pile Group Behavior," Technical Report K-80-5, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
3. CASE Task Group on Pile Foundations. 1983 (Sep). "Basic Pile Group Behavior," Technical Report K-83-1, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
4. Dawkins, William P. 1984. "User's Guide: Computer Program for Soil-Structure Interaction Analysis of Axially Loaded Piles (CAXPILE)," Instruction Report K-84-4, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
5. Hartman, Joseph P., Jaeger, John J., Jobst, John J., and Martin, Deborah K. 1989 (Jul). "User's Guide: Pile Group Analysis (CPGA) Computer Program," Technical Report ITL-89-3, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
6. Jaeger, John J., Jobst, John J., and Martin, Deborah K. 1988 (Apr). "User's Guide: Pile Group Graphics (CPGG) Computer Program," Technical Report ITL-88-2, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
7. Martin, D. K., Jones, H. W., and Radhakrishnan, N. 1980 (Jun). "Documentation for LMVDPILE Program," Technical Report K-80-3, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
8. Morrison, C. S., and Reese, L. C. 1988 (Feb). "A Lateral-Load Test of Full-Scale Pile Group in Sand," Miscellaneous Paper GL-88-1, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
9. Mosher, R. L. 1984 (Jan). "Load-Transfer Criteria for Numerical Analysis of Axially Loaded Piles in Sand, Part 1: Load-Transfer Criteria," Technical Report K-84-1, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
10. Mosher, R. L. 1987. "Comparison of Axial Capacity of Vibratory-Driven Piles to Impact-Driven Piles," Technical Report ITL-87-7, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
11. Mudd, T. J. 1971. "Analysis of Pile Foundation," Paper presented at Structures Conference, Lower Mississippi Valley Division, 23-24 Sep 1969, Vicksburg, MS.

15 Jan 91

12. Ochoa, M., and O'Neill, M. W. 1988 (Jun). "Lateral Pile-Group Interaction Factors for Free-Headed Pile Groups in from Full-Scale Experiments," Miscellaneous Paper GL-88-12, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
13. Radhakrishnan, N., and Parker, F. 1975 (May). "Background Theory and Documentation of Five University of Texas Soil-Structure Interaction Computer Programs," Miscellaneous Paper K-75-2, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
14. Reese, L. C., Cooley, L. A., and Radhakrishnan, N. 1984 (Apr). "Laterally Loaded Piles and Computer Program COM624G," Technical Report K-84-2, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
15. Smith, William G., and Mlakar, Paul F. 1987 (Jun). "Lumped Parameter Seismic Analysis of Pile Foundations," Report No. J650-87-008/2495, Vicksburg, MS.
16. Strom, Ralph, Abraham, Kevin, and Jones, H. Wayne. 1990 (Apr). "User's Guide: Pile Group - Concrete Pile Analysis Program (CPGC) Computer Program," Instruction Report ITL-90-2, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
17. Tucker, L. M., and Briaud, J. 1988. "Axial Response of Three Vibratory and Three Impact Driven H-Pile in Sand," Miscellaneous Paper GL-88-28, US Army Engineer Waterways Experiment Station, Vicksburg, MS.
18. US Army Engineer Waterways Experiment Station. 1987 (May). "User's Guide: Concrete Strength Investigation and Design (CASTR) in Accordance with ACI 318-83," Instruction Report ITL-87-2, Vicksburg, MS.

B-2. Other Publications. All related publications are available on interlibrary loan from the Research Library, US Army Engineer Waterways Experiment Station, Attn: CEWES-IM-MI-R, 3909 Halls Ferry Road, Vicksburg, MS 39180-6199.

19. American Concrete Institute. 1983. "Building Code Requirements for Reinforced Concrete," ACI 318-83, Detroit, MI.
20. American Concrete Institute. 1986. "Recommendations for Design, Manufacture and Installation of Concrete Piles," ACI 543R-74, Detroit, MI.
21. American Institute of Steel Construction. 1989. Manual of Steel Construction, 9th ed., New York.
22. American Society for Testing and Materials. 1974. "Method for Establishing Design Stresses for Round Timber Piles," D2899-74, Vol 04.09, Philadelphia, PA.
23. American Society for Testing and Materials. 1978. "Method of Testing Individual Piles Under Static Axial Tensile Load," D3689-78, Vol 04.08, Philadelphia, PA.

24. American Society for Testing and Materials. 1981. "Method of Testing Piles Under Lateral Loads," D3966-81, Vol 04.08, Philadelphia, PA.
25. American Society for Testing and Materials. 1983. "Method of Testing Piles under Static Axial Compressive Load," D1143-81, 1986 Annual Book of ASTM Standards, Vol 04.08, Philadelphia, PA.
26. Aschenbrenner, T. B., and Olson, R. E. 1984 (Oct). "Prediction of Settlement of Single Piles in Clay," Analysis and Design of Pile Foundations, American Society of Civil Engineers, J. R. Meyer, Ed.
27. Bowles Foundation Analysis and Design. 1977. 2nd ed., McGraw-Hill, New York.
28. Coyle, H. M., and Reese, L. C. 1966 (Mar). "Load-Transfer for Axially Loaded Piles in Clay," Journal, Soil Mechanics and Foundations Division, American Society of Civil Engineers, Vol 92, No. SM2, pp 1-26.
29. Coyle, H. M., and Sulaiman, I. H. 1967 (Nov). "Skin Friction for Steel Piles in Sand," Journal, Soil Mechanics and Foundations Division, American Society of Civil Engineers, Vol 93, No. SM-6, pp 261-278.
30. Davisson, M. T. 1970. "Lateral Load Capacity of Piles," Highway Research Record No. 333, Highway Research Board, National Academy of Sciences--National Research Council, Washington, DC.
31. Deep Foundations Institute. 1979. "A Pile Inspectors Guide to Hammers," Equipment Applications Committee, Springfield, NJ.
32. Deep Foundations Institute. 1981. "Glossary of Foundation Terms," Equipment Applications Committee, Springfield, NJ.
33. Department of the Navy. 1982 (May). "Foundations and Earth Structures." NAVFAC DM-7.2, Naval Facilities Engineering Command, 200 Stovall St., Alexandria, VA.
34. Federal Highway Administration. 1985. "Manual on Design and Construction of Driven Pile Foundations," Demonstration Projects Division and Construction and Maintenance Division, Washington, DC.
35. Garlanger, J. H. 1973. "Prediction of the Downdrag Load at Culter Circle Bridge," Symposium on Downdrag of Piles, Massachusetts Institute of Technology.
36. Hetenyi, M. 1946. Beams on Elastic Foundation, The University of Michigan Press, Ann Arbor, MI.
37. Hrennikoff, A. 1950. "Analysis of Pile Foundation with Batter Piles," Transactions, American Society of Civil Engineers, Vol 115, No. 2401, pp 351-383.
38. Kraft, L. M., Focht, J. A., and Amerasinghe, S. F. 1981 (Nov). "Friction Capacity of Piles Driven Into Clay," Journal, Geotechnical Engineering Division, American Society of Civil Engineers, Vol 107, No. GT11, pp 1521-1541.

39. Matlock, H. 1970. "Correlations for Design of Laterally Loaded Piles in Soft Clay," Paper No. OTC 1204, Proceedings, Second Annual Offshore Technology Conference, Houston, TX, Vol 1, pp 577-594.
